HYPERTEC
MAKING IT PERFORM

Secure your Data with 2FA

As cybercrime becomes increasingly sophisticated, companies are starting to find their old data security solutions are no match for modern attacks and threats. Luckily, it's easy for businesses to add an extra level of protection to safeguard private and company data through two-factor authentication, also known as 2FA.

Protect company reputation and customer data by strengthening security with 2FA. Hypertec Smart Card Readers provide an additional layer of protection; providing personal identification, access control, authentication, and financial transactions. Helping to limit and control the exposure of certain assets to unauthorised personnel.

Ideal for applications that require more security, such as government IDs, e-commerce transactions, campus IDs, network security, electronic cash and health care cards; these approved solutions from market leading brands, are perfect for protecting data from unapproved access.

For more information about 2FA, or to learn more about Hypertec Data Security Solutions, con-tact your Hypertec Account Manager today.
