MAKING IT PERFORM

JUST LAMPS
Making Projector Lamps Simple

Get Identical Performance to OEM Lamps at a Noticeably Lower Price with Diamond Lamps

Clearer Picture

Maintain the clarity of your projector with the highest quality bulbs. Diamond Lamps source only the best bulbs directly from the World's leading bulb manufacturers (including Philips, Osram, Ushio and Phoenix). Achieve top performance in terms of brightness, colour and evenness of illumination across the screen with Diamond Lamps.

Reduce Running Costs

Most compatible lamps are cheaper to buy, but the poor lamp-life they provide create higher running costs. Reduce the running cost of your projector lamps and get better value for money with durable, high quality lamps. Diamond Lamps give exactly the same lamp life as projector manufacturer's lamps but at a lower cost.

24-Month Lamp Warranty

Most projector manufactures' replacement lamps only come with 3-month warranties and compatible lamps with significantly higher return rates often have just 1-month warranties. Get quality performance you can rely on with Diamond Lamps 24-Month Lamp Warranties.

Don't fancy saving money using third party bulbs?

Hypertec and Just Lamps also offer an extensive range of OEM Original lamps. Choose from over 8,500 projector models on the Hypertec Configurator to find the original OEM lamp for your projector's make and model.

Need Help Finding your Perfect Match?

Both Original OEM Lamps and Diamond Lamps can be matched to your projector as an OEM compatible solution. Simply click the Hypertec Configurator link and search for your projector model by brand or via OEM part number.

For more information about **Diamond Lamps**, the full **Just Lamps** range and to find your perfect match; speak to your Hypertec Account Manager today.
