

Evoluent VerticalMouse™ D

Prevent physical discomfort at work with the Vertical Evoluent D Mouse. Unlike standard mice, Vertical Evoluent Mice provide an ergonomic natural 'handshake' position that prevents the twisting of wrists.

The unique shape of the Evoluent D creates a **better ergonomic posture**. Inspired by years of thorough scientific research; the Evoluent D **provides a comfortable position** that can be maintained for longer periods of time without causing strain or pain.

Sculpted from high-quality materials; the Evoluent D has a premium look and feel. Available in three sizes, the mouse is **perfect for virtually all hand sizes**. Please note that this product is only suitable for right handed users.

Designed to hold your fingers in the ideal position, the Evoluent D allows the palm of your hand to fit around the mouse better, resulting in **improved posture** for your arm and wrist.

For more information about the Evoluent Mice range, or to discover our full range of Ergonomic Products, speak to your Hypertec Account Manager today.
