

Worried about the DRAM Shortage? Talk to us!

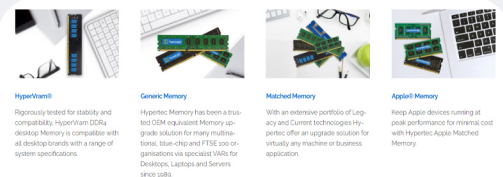

Minimise the disruption caused by DRAM shortages and come and talk to the Number One Brand for DDR2 & DDR3 Memory distributed in the UK B2B Reseller Channel*

The global shift to remote working has driven demand for advanced chips to power premium devices; outstripping supply which was already tight due to impact events and under-investment in DRAM manufacturing facilities. Due to these chip shortages, **DRAM is forecasted to remain in high demand with warnings of price increases and possible shortages throughout 2021.**

As always, our dedicated Product Managers are working hard to navigate stock constraints across the channel, to deliver **the best service for you and your customers.**

Keep finding the perfect Memory match for your customers, Hypertec make buying memory simple. **Contact your Hypertec Account Manager today to get started.**
