HYPERTEC
MAKING IT PERFORM

Safeguard Businesses Against Data Breaches and Hacks with the Hypertec Data Security Catalogue

HYPERTEC
MAKING IT PERFORM

4 | SECURE KVM

Connecting computer peripherals such as keyboard & mouse to a PC introduces potential data leakage and hacking risks. Black Box Secure KVM Switches provide port isolation between networks, ensuring no data is leaked between secure ports and the outside world. Built with true data path isolation between systems and networks, these switches help prevent hardware tampering.

SECURE KVM SWITCHES
