

Looking for the Perfect Dock?

Unlock the ultimate desktop experience and find the best Docking Station for your needs at Hypertec.

Seamlessly connect to multiple devices and expand your workspace, Hypertec Docking Stations provide simple but effective charging, data transfer and video displaying. Delivering high quality video, fast file transfer speeds and up to 100W power delivery, all through a single USB Type-C connection.

Need help finding the right Dock? The [Hypertec Docking Station Selector Flow Chart](#) makes it quick and easy to match the right Dock to user requirements.

Simultaneously display across two HDMI monitors from a single USB-C laptop, with up to 4K resolution with the [ProDockEssential® X](#). Ideal for professionals requiring multiple programs for a single job; the capabilities of the ProDockEssential X help to increase workflow, extending display across two screens, making it easy to transition between separate but related tasks.

Thinking about adding an additional monitor? Combine a Hypertec Dock with a [Lite® by Hypertec Laptop Stand](#) to use a USB-C Laptop as an additional screen – the cost-effective way to integrate an additional screen into set-ups without buying a new monitor.

Transform laptops into the ultimate charging and connectivity hub by pairing Hypertec Docks with a [PowerProEssential Universal USB-C Power Adapter](#). Available in 60W and 100W options, the PowerProEssential allows you to charge any type-C laptop, ultrabook, or mobile device – perfect for all work environments.
