GDPR COMPLIANCE

Products with this icon help reduce the risks of data breaches and help fulfil GDPR compliance standards.

**ISO 27001**

ISO 27001

These products help reduce the risks of data breaches and help fulfil ISO 27001 compliance standards.

With department budgets having to stretch further than ever before; it's never been as critical for organisations to get the most out of their IT budget.

The Data Governance and Device Security Health Check identifies which governance health check points Hypertec can help address. Providing solutions for Infection Control, Track and Trace for Devices, GDPR and ISO 27001 compliance; the checklist demonstrates how potential health and data threats can be minimised, highlighting the best fit solutions to keep organisations and businesses working productively, securely and safely.

For more information about the Governance Data Governance and Device Security document, or to learn more about featured products, contact your Hypertec Account Manager today.
