

Transform DeX Enabled Smartphones into Feature Packed Computers

The Mirabook is the ultimate smartphone accessory designed to deliver a **full desktop experience**. Simply connect a DeX enabled smartphone to transform it into a complete 13-inch laptop with a full sized keyboard and trackpad.

The Laptop Dock

Extending the capabilities of DeX enabled smartphones, the Mirabook provides all the basic connections usually found on laptops: USB-C for fast charging, HDMI output, Audio Jack 3.5mm, 2x USB-A 3.0 and Micro SD Card Extender.

Safeguard Sensitive Data

With biometric authentication capabilities* that go beyond password protection, smartphone security currently exceeds the capabilities of standard laptops. Using a Mirabook connected to a DeX smartphone provides an extra layer of security against unauthorised personnel accessing stored data.

Running applications and software directly from DeX smartphone also means there's **only one device to secure and no need for data synchronisation**. This helps limit the number of devices holding sensitive information; reducing the chances of data breaches and hacking.

The Affordable Laptop

Reduce IT deployment costs, the Mirabook costs a third of a traditional laptop and reduces the need to deploy additional high-powered devices.

Ultra-Portable

Unequally autonomous and lightweight compared to a standard PC, the Mirabook is the ultimate mobile solution.

For more information about the Mirabook, the full Hypertec range, or to see how we can help you, contact your Hypertec Account Manager today.

*Feature will vary with individual smartphone capabilities and operating systems.

Features:

- ✓ 13.3" HD Display
- ✓ Full Sized Keyboard and Trackpad
- ✓ Black Aluminium body
- ✓ Up to 10 hours of battery life
- ✓ Feather weight 1.3KG / 2.8 Pounds
