MAKING IT PERFORM

Can your Infrastructure Continue to Support Remote Working?

Ensure your Infrastructures can continue to support the constraints and demands of a remote workforce, and provide staff with a base for productive and comfortable home working.

After discovering the numerous benefits of remote working, 74% of companies have plans to keep at least 5% of their formerly in-office employees in remote work positions following on from the pandemic.*

Designed to identify the correct Upgrade Solutions for your specific Infrastructure, the Matched System Upgrade Tool is easy to use, and saves time helping to provide bespoke Upgrade Solutions tailored to your needs. Using a quick form to simplify requirements with a handful of simple questions, we are able to identify the best solution to adhere to your preferences. Simply fill out the online form today to get started.

Ease the productivity woes and strains for workers that are working remotely with a laptop specification not suited their workload. The Hypertec Self-Install Memory Service supports device upgrades without having to recall laptops back to a fixed location, minimising downtime, new device deployment and cost pressures.

Keep Home-workers active, alert, healthy and productive with unique Working From Home Bundles from Hypertec. We can create bespoke bundles tailored for the specific needs and requirements of your team, providing them with all the equipment needed to work efficiently from home. Contact your Account Manager today to get started.

For more information about Remote Working Products and Services, or help building a complete remote working Infrastructure, contact your Hypertec Account Manager today.
