

Overcome the Challenges of Homeworking with Synology Mesh Wi-Fi Systems

With whole households working, streaming and relying heavily on WiFi, home internet speeds can become slow and sluggish. This can spell trouble when combined with Internet Service Provider supplied Routers, which are not strong enough to cover and support the bandwidth requirements of multiple users.

Synology® Mesh Wi-fi systems allow you to [connect multiple wireless access points together to cover your entire home with a strong internet connection](#); automatically steering devices to the band that can provide the strongest signal and speed, ensuring the best connection for all active devices.

Supercharge your internet experience, the Synology Router RT2600ac is perfect for homes and small offices looking to control, understand, and secure their network. With Mesh Wi-Fi technology, its coverage becomes [easily expandable with additional Synology MR2200ac](#).

Synology Mesh Wi-Fi System Features:

- ✓ Best-in-Class Parental Controls
- ✓ Real-Time Monitoring
- ✓ Easily Expandable
- ✓ Business-Grade Security
- ✓ Automatically Steers Devices to the Strongest Signal and Speed
